## **C o n t e n t s :**

<b>Ersin Aslan and Alpay Kirlangic:</b> <i>Computing The Scattering Number and The Toughness for Gear Graphs</i>	1-11
<b>Ivan Gutman:</b> <i>Multiplicative Zagreb Indices of Trees</i>	13-19
<b>Daniel A. Romano</b> <i>Dedekind Partial Groupoids for Anti-ordered Sets</i>	21-26
<b>R. A. Rashwan and S. I. Maustafa</b> <i>Common Fixed Point Theorems For Four Weakly Compatible Mappings In Menger Spaces</i>	27-38
<b>Y.B.Venkatakrishnan amd V.Swaminathan</b> <i>Complement free domination number of a bipartite graph</i>	39-43
<b>R. A. Rashwan</b> <i>A common fixed point Theorem of two Random operators using Random Ishikawa iteration scheme</i>	45-51
<b>Zygfryd Kominek</b> <i>On the Hyers-Ulam stability of Pexider-- type extension of the Jensen-Hosszu equation</i>	53-57
<b>N. Rajesh and V.Vijayabharathy</b> <i>On <math>(\gamma, \gamma')</math>-connected spaces</i>	59-65
